

AMENDMENTS TO THE DRAWINGS

A replacement sheet attached to this paper replaces the replacement sheet submitted with the amendment dated March 3, 2008, that included amended FIG. 4. FIG. 4 has been further amended to remedy an objection raised against the drawing regarding the inclusion of the schematic representation of a motor. Although Applicant disagrees with the objection and does not believe the inclusion of the motor in FIG. 4 represents new matter, the representation of the motor has been removed from FIG. 4.
